INFORMATION SECURITY POLICY

node101 Information Security has adopted the following objectives as a policy to protect the organization's reputation, credibility, and information assets, and to ensure that core and supporting business activities continue with the least possible disruption:

- To protect the information assets that the organization processes, maintains, and shares with other organizations in accordance with the principles of confidentiality, integrity, and accessibility;
- To develop and continuously improve the management system established to manage information assets, identify the security values, needs, and risks of the assets, and implement controls for security risks.
- To assess the risks arising from activities in accordance with the institution's strategic plan and to identify continuous improvement needs and opportunities,
- To keep pace with and monitor technological developments and changes within the scope of the services provided,
- To ensure business continuity by reducing the impact of information security risks,
- To comply with national and international regulations, legal and relevant legislation requirements, obligations arising from agreements, and corporate responsibilities towards internal and external stakeholders,
- To have the competence to quickly respond to potential information security incidents and minimize their impact,
- To maintain and improve the level of information security over time with a cost-effective control infrastructure,
- To improve the institution's reputation and protect it from negative impacts based on information security.
- To safeguard personal information in accordance with the Personal Data Protection Law, To conduct training to improve employees' information security awareness and competencies, and to be a model organization in the sector by integrating with other management systems and providing the necessary support.

Each member of node101 is responsible for acting in accordance with these stated goals and contributing to the system.
